8 NOV 1957

f. Period of regeneration for unit?

70 minutes maximum capacity.

g. Approximate power required for operation of unit?

Connected full load is 34 K.W.

h. Cost of installation?

\$10,200 paid by contractor for the unit.

i. Operating difficulties or problems?

Excellent results have been obtained with this unit. We have experienced no mechanical trouble. Maintenance is easily applied and minor electrical difficulties are our only problems.

j. Miscellaneous comments:

It is recommended that for future installations the unit be isolated from the general storage area by partitioning of grillwork, hardware cloth, etc. Adequate lighting (permanent wall fixtures) for servicing such units would be advantageous.

2. Additional information will be provided upon request.
